

Social Distancing Signage

Social Distancing signage has emerged as a new application sector. Businesses must adhere to the guidance surrounding Covid-19 and the need for safe distancing of people. Sign professionals have an important role in delivering social distancing signage across a wide range of application surfaces. The challenge is international.

When in position, the effective visual communication manages the flow of people in their surrounding environment and a variety of public spaces, using floor signage, window graphics, directional stands etc. Employees, staff, students, shoppers, customers, workers, and passengers are some of the many people this signage addresses.

The Government's guidance and that from the World Health Organisation, serves to protect the public, employees, customers and the workplace as businesses re-open in a safe way. Offices, retail, construction, schools and colleges, cafés, sporting events, washrooms and POS contactless transactions all create the need for safe signage.

Wall Graphics and Coverage

Beyond the need for zone specific signage, walls present a blank canvas for visual communication. Full or partial wall coverage graphics allow all types of facilities to deliver an effective message.

Metamark MD-WA WallArt Décor Wall Covering

An ideal solution for printable wall coverings, the textured weave finish provides a highly vibrant print image, without lamination. The high level of opacity makes for no show-through on overlap joins and the MetaScape air release allows for ease of handling and installation.

Digital print brings vibrant colours and bespoke changeable graphics to wall and furniture coverings. Whether within cafés and restaurants, leisure or offices, the range of Metamark products have been developed to offer ease of use, vibrant coverings and a durable high quality finish every time.

DecorMark
INSPIRING SPACES

Metamark MD-TX2 WallTex Self Adhesive Textile

The low tack self-adhesive Polyester fabric offers a clean, easy to apply alternative to traditional wall coverings. The lightly textured weave is PVC free, and the repositionable adhesive is removable in the short term on sealed surfaces.

Floor Graphics and Coverings

Indoor floor graphics are vital in providing direction, route marking and distancing signage. Metamark products are tested in accordance with DIN 51130 and BS 7676-2:2002 (Slider 96) anti-slip test rating certification.

Metamark MD-MW MetaWalk Textured Floor Graphic

Designed for use as a temporary floor graphic solution. It can be applied to either smooth, indoor floor surfaces in good condition, or indoor short pile carpets. MD-MW is a one-part system, which can withstand regular levels of foot traffic. The product is slip tested to DIN 51130:2014, achieving an R10 rating.

Digital print brings vibrant colours and bespoke changeable graphics to wall and furniture coverings. Whether within cafés and restaurants, leisure or offices, the range of Metamark products have been developed to offer ease of use, vibrant coverings and a durable high quality finish every time.

Metamark MG-F MetaGuard FloorArt Overlaminate

Matched to Metamark digital vinyl media. The 100 micron matt embossed film is a textured floor overlaminates that gives durable protection to graphics, with an easy to clean finish. This versatile product has anti-slip finish and can also be applied to wall graphics, for a one product solution. The product is slip tested to DIN 51130:2014, achieving an R9 rating.

POS and Retail

Social Distancing signage will now play a significant role in protecting the general public and retail customers, as well as delivering various communications. Customer facing points of contact help enforce directional route marking and enhance contactless transactions.

Metamark MD-RU330 and MD-RU200 Roll Up Display Media

Metamark roller banners are tried and tested effective display systems. Offering excellent layflat properties and printer compatibility, the MD-RU330 and MD-RU200 can be used with roller banner cassettes.

Digital print brings vibrant colours and bespoke changeable graphics to wall and furniture coverings. Whether within cafés and restaurants, leisure or offices, the range of Metamark products have been developed to offer ease of use, vibrant coverings and a durable high quality finish every time.

Metamark MD-DOT MetaDot Digital Vinyl

Featuring a dot pattern adhesive system for fast, easy and bubble-free applications, MetaDot media can be installed, repositioned and removed easily on site by the end user. Designed for use on a wide variety of flat substrates, such as glass, MetaDot is ideal for POS display and visual merchandising.

Window Films

Glazing is one of the primary substrates found within offices, hospitality, and retail environments, it therefore provides an ideal substrate for Social Distancing signage, whether using opaque, translucent, permanent, or removable media.

Metamark MD-CR / MD-CRR and MD-CRV Optically Clear Polyester Window Films

The Metamark range of printable, optically clear window films are ideal for use on windows for both promotional and permanent graphics. The various adhesive combinations offer clean removability and all products produce striking high definition images for clear communication.

General Signage and Safety Labelling

Metamark offers a broad range of media for a wide range of applications surfaces, from short term advertising and display, to indoor and outdoor graphics, as well as suitability for high energy or hard to stick surfaces.

Metamark MD5 Series High Performance Calendered Vinyl

The MD5 Series, which is matched to MetaGuard 700 Overlaminate, continues to be the reference media for a wide range of applications. The highly versatile high-performance film comes in a number of variations.

MD5

MD5 prints like no other pressure sensitive media out there. That's what makes it the choice of big brands, successful sign producers, printer manufacturers and printer engineers the world over.

MD5 comes in many variations to suit different applications, visit www.metamark.co.uk/products/metamark-md5

Metamark MDP-H High Tack Vinyl

The high tack 100 micron print media is ideal for print and cut safety labels, and directional decals onto flat and hard to stick to surfaces. The adhesive helps solves challenges of low energy surfaces, and is still easy to apply.

Metamark MD-100 Series 3 Year Calendered Vinyl

The MD-100 promotional media is matched to MetaGuard 100 Overlaminate and ideally suited to shorter term signage. The film gives the product ease of handling and the bright white finish offers brilliant colour reproduction.

Metamark MD3 Series Intermediate Grade Calendered Vinyl

MD3 vinyl offers a very high level of performance for medium term applications onto most flat or gently curved surfaces. It is matched to MetaGuard 300 Overlaminate and is also available in different variations.
